

LEED/Sustainability Special Interest Group (SIG)

Mission Statement

The American Society of Professional Estimators (ASPE) LEED/Sustainability Special Interest Group (SIG) serves our members by providing a forum dedicated to discussing all queries, concerns, ideas, and questions from ASPE members related to LEED/Sustainability issues. We also shall provide information and resources on “green” products, subcontractors, suppliers and manufacturers and will become a resource for estimators and others seeking cost information on LEED construction.

Our goal is to investigate and analyze the cost implications of LEED (and other sustainability programs) and strive to work with, and report to, the USGBC and other bodies on this issue.

Joseph J. Perryman MRICS MAPM
SIG Chairman
